

THE INTERNATIONAL COUNCIL OF THE AERONAUTICAL SCIENCES

ICAS was founded by Theodore von Karman in 1957 as a non-governmental, not-for-profit scientific organization to encourage the free international exchange of information on aeronautical research and technology.

The mission of ICAS is to provide regularly scheduled events and publications that enable a better understanding of engineering science and practice and an improved level of cooperation among aeronautical engineering professionals from around the world. ICAS currently serves as the only international support organization to representative aeronautical engineering professional societies and their members in 30 countries.

ICAS functions under three primary bodies: Council (meets annually), Program Committee (meets at least twice each year) and Programme of Work. ICAS holds an International Congress in the fields of Aeronautics and Astronautics on a biennial basis. The venue is chosen by the Council and changes from year to year. Furthermore ICAS organizes a thematic workshop in the year between the International Congress in connection with the meeting of the Program Committee.
